

# Provision Software brings automation and simplicity to your health department.

***“This system has effectively made our department paperless...”***

“This system has effectively made our department paperless, and avoids double data entry through linkages with WIR (Wisconsin Immunization Registry) and WEDSS (Wisconsin Electronic Disease Surveillance System). The best part is that we’ve been engaged in the structure and design of the system within the region, so we’re getting exactly what we want and need.”

**– Darren J. Rausch, MS, CPH**

*Health Officer/Director  
Greenfield Health Department*

- Need help eliminating paper? With Provision it’s easy to scan and import your images and documents.
- Looking for flexible and fast ways to chart?
- Want to eliminate double entry with integration to Immunization Registries and Electronic Disease Surveillance Systems?
- Would you like to be part of a devoted monthly user group working together on ideas and direction of the software?
- Wouldn’t it be nice to receive alerts as clients check in, as new tasks are assigned, and to know when important items need follow-up? Time to get rid of those sticky notes!
- Need an easier way to track time for community and client based services?
- How about an easy way to assign cases, track referrals and generate productivity results?
- Are spreadsheets proving inefficient for your day to day activities as time tracking and scheduling?
- Would you like a master calendar for all events at your health department and a quick way to schedule by nurse, type of clinic, and location?
- Need a way to create your own letters and forms with key items populated? Save time and eliminate the hand writing.
- Do you need expertise on accurate and easy billing of your services to insurance carriers?
- We offer simple software solutions, customized by you, so now you have more time to relax.
